

# Time to dispel the myth!

**'Compressed air drying systems  
NEED NOT cost 9-10 times that of a  
blower driven air knife system'**

## Applications:

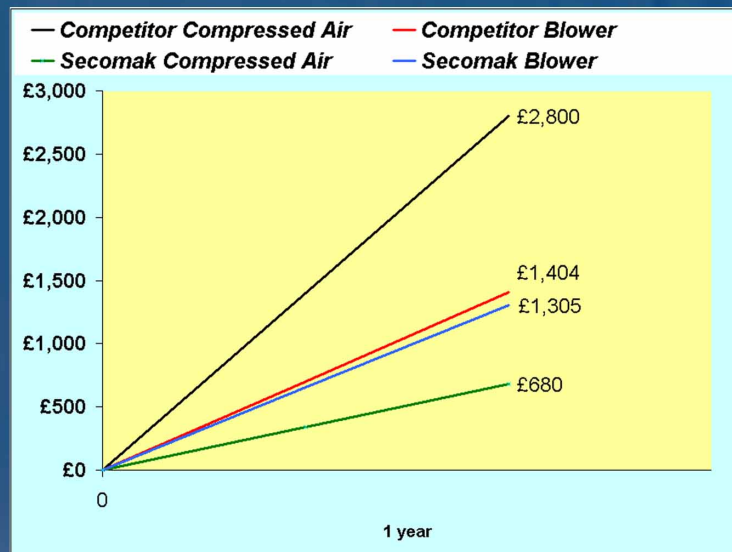

- Under Crown Drying
- Under Cap Drying
- Spot Drying
- Bulk water extraction
- Legionella Control

*Secomak are the only supplier of specialist drying systems that recognise the benefits of both compressed air and blower generated air for use in container and bottle drying applications.*

*As the leading global supplier of drying systems, we utilize the features of both mediums to offer our customers superior cost effective technically advanced solutions.*

## The Benefits:

- Improved quality
- Increased productivity
- Improved environment
- 77 dB(A)
- Low running costs
- Energy savings
- Low capital cost
- Ultra a small footprint
- Ease of install
- Minimal maintenance

*Graph shows running costs of comparative Under Crown Drying Systems*

**Whatever your drying need, consult the specialist !**
